

Cableless LED Pavement Sign

Effortless Mobility with Flexible Placement

Our cableless, portable, and freestanding LED signs offer ultimate flexibility, allowing easy positioning indoors or outdoors, even in areas without power outlets. With no need for construction or wiring, these signs provide a simple setup that enhances your brand's visibility. Ideal for sidewalks, storefronts, or high-traffic areas, these eye-catching displays attract attention and elevate your business presence.

Powered by Universal V-Mount Batter

Our signs use V-Mount batteries with a world-wide compatibility standard, allowing our international clients to easily purchase batteries in any country without concerns about import issues, warranty, or maintenance. Upon request, we can assist in selecting the most suitable batteries for onsite use, ensuring reliable and long lasting performance.

Fully Customized Sign for Businesses

The overall design of the signs can be tailored to align with your business' s brand image, power system, and environmental requirements. This ensures that the signs not only complement your brand style but also adapt to the specific needs of the location, effectively boosting visibility and driving business growth.

Revolutionize Your Display with Cableless LED Signs-No Construction Required

- ▲ It can be easily installed on the road next to the escalator where people must pass

In malls and shopping areas without power outlets, adding new signs typically requires extra construction and makes it difficult to change their position. Our cableless signs address this with easy mobility and quick poster and battery replacements, allowing you to adjust ads as needed. This not only boosts customer traffic but also enhances the mall's appearance, bringing more business to the stores.

From Storefront to High-Traffic Zones: The Advantage of Cableless Signs

- ▲ Promote sales activities of brand stores on each floor.

- ▲ Guidelines for promoting new stores or various activities in Lubicha District

Cableless LED portable signs free you from the limitations of placing signs only next to your store. Instead, you can flexibly position them in high-traffic areas like stations, the middle of food streets, or outdoor sections of shopping malls, making your business promotions more effective and increasing brand awareness. Even in low-light or outdoor environments, our signs ensure your promotional displays continue to attract attention, guiding more customers to your business and enhancing brand visibility.
